UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

B.E.P.Q. 415

Oct. 22, 1936

ADMINISTRATIVE INSTRUCTIONS--AUTHORIZING EXTENSION
OF HARVESTING SEASON FOR TEXAS CITRUS FRUIT

(Issued under regulation 7, sec. A, Federal Quarantine No. 64)

(Issued Oct. 22, 1936; effective Oct. 22, 1936)

Pursuant to regulation 7, section A, of Notice of Quarantine No. 64, the Mexican fruit worm quarantine, and it having been shown that such modification of the beginning of the host-free period is desirable and that it will not involve increase of risk of propagating the Mexican fruit worm, the State of Texas is hereby authorized to extend to the close of March 30, 1937, the harvesting season for citrus fruit from the regulated area of the State of Texas, as established by said Notice of Quarantine, consisting of the counties of Brooks, Willacy, Cameron, and Hidalgo; provided that conditions of infestation or lack of observance of sanitary requirements and failure to comply with clean-up restrictions do not necessitate the authorization of an earlier closing date.

The discovery of any infestation of this insect within the regulated area will of necessity require immediate eradication and precautionary clean-up measures in any area which may be involved.

R. G. TUGWELL
Acting Secretary of Agriculture.
